SUMMARY

Business Analytics (PGDM) student with hands-on experience in product analytics, MSME lending, and credit risk research. Skilled in SQL, Python, and Power BI, with a proven ability to translate business problems into data-driven insights that support credit decisioning and product strategy.

SKILLS

Business Analysis & Domain: Requirement Gathering, Business Process Mapping, Gap Analysis, Competitive Analysis, Stakeholder Management, Product Analytics, Credit Risk, MSME Lending, FinTech

Programming & Analytics: Python, SQL, Java, R, Excel

BI & Visualization: Power BI, Tableau, Plotly, Streamlit, Data Visualization

Databases & Backend: PostgreSQL, MySQL, REST APIs, Spring Boot, Thymeleaf, ETL Pipelines

Data Science & AI: Supervised/Unsupervised Learning, Prompt Engineering, RAG, Fine-Tuning, LLM Evaluation Metrics

Tools & Methodologies: Git, GitHub, Jupyter Notebook, Visual Studio, VS Code, IntelliJ IDE, Agile/Scrum, SDLC

EXPERIENCE

Recordent Pvt. Ltd — Product Analyst Intern

June 2026 – Present

- **Mapped India's MSME lending lifecycle across 16 stages**, from sourcing and underwriting to credit decisioning, post-lending monitoring and collections, identifying process gaps, data dependencies and credit-risk blind spots.
- **Analyzed MSME lending and underwriting** workflows across banks, NBFCs, fintechs, DSAs, digital lending, TReDS and embedded finance; evaluated bureau, banking, GST and ITR data to identify gaps in current borrower assessment.
- **Conducting product and platform research** across the lending ecosystem, including live platform observations and mapping 139+ Recordent product features across the MSME credit lifecycle to identify opportunities for differentiated A/R-led credit intelligence and real-time borrower monitoring.
- **Contributing to the broader credit-intelligence roadmap**, spanning competitive benchmarking, credit decision frameworks, testable risk hypotheses, borrower health scoring and AI-driven decisioning using A/R, bureau, GST, financial and alternative data.

Codekul — Software Developer Intern

October 2023 – January 2024

- Developed a print-ready billing module using Thymeleaf and Spring Boot for DocITHealth, enabling structured invoice generation and printing.
- Implemented real-time PostgreSQL database replication to improve data availability and support reliable application operations.

PROJECTS

NexusIQ — Enterprise Decision Intelligence Platform

- Built an enterprise decision intelligence platform unifying revenue, customer, product, and forecasting modules into a single executive dashboard.
- Designed ETL pipelines and a PostgreSQL star-schema data warehouse enabling centralized reporting across 25+ business KPIs.

Tech Stack: Python, PostgreSQL, Streamlit, Plotly, SQLAlchemy, Machine Learning

Competitive Analysis Intelligence System (CAIS)

- Developed a competitive intelligence platform benchmarking 10+ institutes to support strategic and social media analysis.
- Automated benchmarking workflows, reducing manual research effort by ~25% and improving reporting efficiency.

Tech Stack: Python, Power BI, SQL, Excel

EDUCATION

NLDIMSR — PGDM (Business Analytics)

July 2025 – Present

KDK College of Engineering, Nagpur — BE (Information Technology)

August 2019 – May 2023

EXTRACURRICULAR ACTIVITIES & RESPONSIBILITIES

Placement Representative — NLDIMSR

August 2025 – Present

- **Manage IT-sector placements**, leading recruiter engagement, mentoring 2 sector coordinators, coordinating with recruiters, HR teams and the Placement Committee, and supporting mock GDPI sessions for placement preparation.
- **Serve as SPOAX Representative for 15 students**, managing placement queries, resume tracking, interview coordination, and student-recruiter communication across the hiring process.
